[EXPERIENCE MAKES THE DIFFERENCE]***

**COLLOQUE INTERORDRE
DE LA RECHERCHE ÉTUDIANTE
EN SCIENCES SOCIALES ET HUMAINES,
EN ARTS ET EN LETTRES**

Université Laval, Friday, May 31, 2024

New submission deadline: February 29, 2024

Proposal Selection Notice: March 22, 2024

Who can submit a proposal?

College, graduate and PhD students are encouraged to submit a poster proposal in the fields of social sciences and humanities, arts and literature (SSHAL). According to the Fonds de recherche du Québec – Société et culture, SSHAL include the following [fields of research](#):

- Arts, Literature and Society
- Writing and Fine Arts
- Cultures, Religions and Civilizations
- The Development and Functioning of Individuals, Communities and Social Living
- The Economy, Employment and Markets
- Education, Knowledge and Skills
- Fundamental Issues and Meaning of Life
- Organizational Management
- Language and Languages
- Media, Communication and Information
- Living Environments, Planning and Appropriation of Human Spaces
- The Nature, Transformation and Governance of Society and Institutions
- International Relations and Development

Call for proposals for college students

The aim of the Colloque interordre de la recherche étudiante en sciences sociales et humaines, en arts et en lettres is to allow college students from all [college-level programs](#), both pre-university and technical, interested in pursuing research in these fields to present a [poster](#), in French or in English.

Call for proposals for university students

Graduate and PhD students are invited to give an [oral presentation](#), in French or in English, in the fields of social sciences and humanities, arts and literature.

Call for proposals for inter-level teams

Graduate and PhD students who are part of an inter-level team are invited to present either a [poster](#) or an [oral presentation](#), in French or in English, in the fields of social sciences and humanities, arts and literature.

You can fill out the interactive proposal form at the following address:
<https://event.fourwaves.com/fr/arc2024-colloquesshal/soumission>.

What criteria will be used to evaluate the proposals?

Here are some suggestions to help you produce an excellent resume. Use them as the basis for your own proposal. Your proposal must be based on original research. This is what the Evaluation Committees that review the proposals will be looking for. Moreover, the proposals selected by the committees will be published in various documents and, if they meet all criteria, may even be quoted.

Catchy title

(maximum 30 words)

- Choose a short, specific, informative and clear title that encapsulates the communication topic.
- Be creative: Use wording that will pique the curiosity of the evaluation committees as well as colloquium participants.

Full abstract

(maximum 200 words)

- Build your abstract in one paragraph, around the following four elements: a clear statement of the issue; a succinct description of the methodology; final or preliminary findings depending on the project's progress; and a conclusion.
- Follow the general principles of gender neutral writing.
- Avoid redundant wording such as: "This poster shows that..."

Excellent writing

- Use jargon-free language.
- When using abbreviations, first put the full expression, then the abbreviation.
- Only use mathematic formulas or statistics if these contribute to the clarity of your message.

Reference documents for writing a poster proposal: Get inspired!

Once a proposal is accepted, ARC will send the authors a list of useful documents on how to prepare an excellent presentation.

Offering or receiving support: A matter of reciprocity!

Why not put your experience to work or benefit from the experience of your peers, whether you're writing a proposal, participating in the event or preparing a scientific paper. For the *Experience makes the difference* project, 10 scholarships of \$600 each will be awarded to Graduate and PhD students who wish to provide support to three first-time participants at a scientific colloquium. Whether you'd like to offer or receive support, fill out the online application form below: <https://event.fourwaves.com/fr/arc2024-colloquesshal/soumission>.

Why organize an inter-level colloquium on student research in the fields of social sciences and humanities, arts and literature?

The main objective of the colloquium is to provide students with the opportunity to participate in an event dedicated to scientific communication and knowledge transfer. More specifically, it aims to promote research in the sector of social sciences and humanities, arts and literature, to encourage college students to pursue a field of study that interests them, to offer participants a venue for networking, to offer them an opportunity to experience a science day (sometimes for the first time), to promote discussion and contacts between college and university students, and, finally, to recognize and highlight the efforts they invest in their research activities.

If you need financial assistance to attend the colloquium

We encourage you to check with your department, student association, student services or the research team with whom you are collaborating to see if you can get financial aid to cover your travel and accommodation costs. If you wish, we can provide suggestions for where to stay near the event. Please contact us for more information.

What is CTREQ?

The Centre de transfert pour la réussite éducative du Québec strives to promote educational success and lifelong learning by strengthening the capacity of stakeholders and organizations to innovate, based on knowledge gained from research and practice.

What is ARC?

The mission of the Association pour la recherche au collégial, founded in 1988, is to promote college research by representing the interests of individuals and groups engaged with such research, by organizing activities to recognize excellence in college research, and by providing services to the college research community.
